PRODUCT DESCRIPTION:

DA Sealing Gel is a one-component, water-based, non-yellowing acrylic gel, used for sealing substrates and improving adhesion of water-based coatings on microcement and mineral surfaces. It enhances resistance to water and alkaline substances.

APPLICATION CONDITIONS:

- Application temperature: +10°C to +35°C

CONSUMPTION:

- DA Sealing Gel: approx. 100 grams per m²

PRESENTATION:

- DA Sealing Gel is available in a 5 kg bucket, ready to use.

SHELF LIFE:

- Up to 12 months from production date, if stored sealed in the original bucket and protected from extreme weather and/or humidity.
- Keep the bucket edges and lid interior clean.
- Protect from frost. Store in a cool, dry place.

DRYING TIME:

- 3 to 4 hours

COLOUR:

- Transparent
